

## Chada Katavi Katavi

This simple tented camp is located right in the heart of the Katavi National Park, renowned to be one of the wildest places on the planet. From its elevated vantage point on a peninsula that rises out of the miombo woodland, the camp is perfectly positioned for panoramic views over the Chada plain. Filling the floor of the Rukwa Valley - a minor fault of the western rift, Katavi National Park spans over a million acres.

Katavi belongs to the animals. You are their guest. Chadas humble nod of recognition to its hosts is evident in the accommodation consisting of spacious safari tents, a blend of brown canvas, leather & brass, camouflaged against a thicket of tall trees. The canopy of acacias, kigelias and tamarinds are a popular source of shade and food for abundant bird and animal life, creating fantastic game viewing opportunities almost without having to leave your tent.

The main camp sits on the edge of the wide Chada floodplain, a Mecca for game. From a distance, the camp is invisible against the browns and golds of the surrounding bush. Although supremely comfortable, the camp neither intrudes upon nor detracts from the majesty of the place itself. The eight side-opening tents seem a mere speck against the endless expanses.

Private bathrooms are set right behind each tent and can be connected to the main tent quickly & easily if required. Invoking the style of the great campaigns. Chada remains seen by only a small handful of visitors.

- 8 safari luxury ensuite tents.
- Walking safaris possible.
- Excellent game viewing from July through until November.
- One of the last true wilderness areas left in Africa.

### Our View

Of all the parks in Tanzania, Katavi is still probably one of the most astounding and least visited of them all. This gives the park a special place for anyone who has flown in over the vast plains to see herds of up to 4 thousand buffalo being hunted by the large lion prides that reside here.

The camp itself is set in a great area of the park, away from the other camps, at the end of the main river area. With each tent having their own bush showers and loo, they are by no means basic, but it gives the camp a feeling of being back to a bygone era.
