

Kirurumu Tented Lodge Lake Manyara

Kirurumu is a small tented lodge located outside Lake Manyara National Park. With the most stunning views of virtually anywhere in Tanzania, Kirurumu looks out over the rift valley and down on to Lake Manyara itself - a simply beautiful spot!

Kirurumu is the only owner-run safari camp at Lake Manyara and the most atmospheric, with permanent tented rooms built onto a stilted wooden base, designed to give each a private bush enclosure with its own undisturbed view. Wonderfully hot and powerful showers with solar-heated spring water in every tent make it hard to fault.

The open-sided dining room and naturally sanded wood and rock-enclosed bar also make the most of the location, and food and service are excellent. Meals rely heavily on fresh fruit and produce, and vegetables and herbs from their own organic garden, and are greatly enhanced by a selection of fine wines from the bar.

Its position outside the Park means that Kirurumu is free from Park rules, and the lodge specializes in botanical walks through the surrounding bush with Maasai guides to describe the medicinal uses of plants. The many resident bird species will delight watchers, and a watering hole and extensive bird list help you spot and name them.

- 22 tented rooms.
- Stunning views.
- Good cultural interaction.
- Family friendly.
- Can be used for Manyara and Ngorongoro.

Our View

This is a really great little camp, even the somewhat bizarre orange bathrooms provide character! We really like this place - a refreshing option for those of us who do not want to stay in the large hotels for the duration of their Northern circuit safari.

The views are simply stunning and the local village near the camp is a great place to explore.
