

Kusini Camp Serengeti

Located in the South West of the Serengeti well away from the principle tourist circuit Kusini Tented Camp, offers guests the rare opportunity to experience the Serengeti the way it should be. Many people regard Kusini Tented Camp as one of the best lodges, certainly in the Serengeti but also in the whole of Northern Tanzania.

We are pleased to say that Kusini Tented Camp has recently had a bit of a refurbishment; there are now twelve large en-suite tents all of which have been finished to a luxurious standard, featuring antique furniture and wide vistas as far as the eye can see. The main area of the Kusini continues with the spectacular opulence of the rooms, comprising a good sized dining area, library and lounge with comfortable sofas in which to relax after a hard game drive!

Aside from the obvious luxury of the camp, what really sets Kusini Tented Camp apart from its competition in the Serengeti is its remote location in the South West of the Serengeti... it is the way the Serengeti was 40 years ago! The resident game here is also good so even if you miss the migration game viewing should still be impressive.

- Located in the South West of the Serengeti.
- 12 large and luxurious en-suite tents, each with their own personal butler.
- Perfect for the Migration in January, February and March.

Our View

One of the best camps in the Serengeti! Its location, hidden away from the crowds is the main appeal as well as the standards of service and overall quality being set extremely high. This area of the Serengeti is known for being a little more parched than other areas in the Serengeti, but the lodge has been set with small rivers nearby which provide good, year round water supplies for game. A superb lodge although possibly better suited for those willing to pay a little more.
